Adopt-a-Teacher*

Volunteer for the USC Viterbi Annual Robotics Open House Wednesday, April 11!

You don't need to know anything about robotics or computer science to volunteer, but you'll get to check out the robotics labs & be a big shot to young students.

We invite individuals to sign up for this fun day, and we are also running a contest to reward student organizations that have the largest number and percentage of their members volunteer on 4/11:

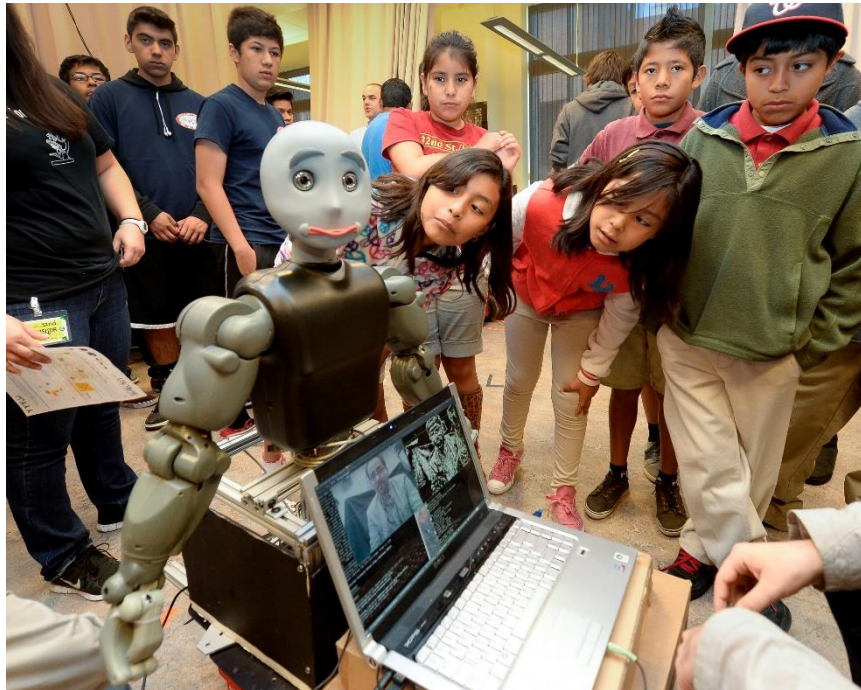

First Place: \$400

Second Place: \$200

Third Place: \$100

Organization funds can be used in any way, no strings attached! In addition, all student groups volunteering will be featured on a page on the Robotics Open House Website and on social media. If there are t-shirts, we will put the logos of the winning orgs on the t-shirts.

Organizations will receive 2 points for every volunteer participating from 8 am – 1 pm (when we need the most people), and 1 point for volunteers participating in each time slot thereafter. No-shows on 4/11 will result in the deduction of points assigned to that volunteer (either 1 or 2 points, depending on time of day), and more than three no-shows from any one organization results in an additional penalty of five points). We want you there!
