iOS Developer

at Top

Los Angeles, CA or Remote

Top is building the best task management and productivity tool for college students in the world. Founded at the University of Southern California, our mission is to enable students everywhere to achieve their productivity goals and realize their full potential.

We are looking for an entrepreneurially-minded iOS Developer to join our team. Working from our Los Angeles office or remotely, you will play a key role in building the Top mobile app, which students will use to effectively manage their daily goals in a fun and stress-free way.

Key Technical Requirements

- Demonstrated ability to write clean, high-performance code in Swift
- Deep understanding of iOS design patterns and the Cocoa Touch framework
- Demonstrated experience with a version control service (e.g. GitHub)
- Demonstrated experience deploying and managing mobile backend services
- Deep understanding of computer science fundamentals and related best practices (data structures, algorithms, object-oriented programming, etc.)

Key Non-Technical Requirements

- Passion for Top's mission and for problem solving
- High level of figure-out-ability (Resourcefulness in tackling problems)
- Ability to effectively communicate verbally and in writing
- Team-oriented mindset and approach
- Proactive work style

Top Performer Bonus Points

- Proficiency in Python, Objective-C, and/or Java
- Demonstrated experience writing machine learning algorithms
- Demonstrated experience developing web applications
- Familiarity with the Lean Startup methodology
