Full-Stack Web Developer

at Top Technologies, Inc.

Los Angeles, CA

Top Technologies, Inc. is a student success company. Our mission is to enable students everywhere to succeed through personalized tools that help them produce, connect, and engage.

Our debut product, Top, is the first student planner that can automatically schedule, prioritize, and track assignments and exams—thereby helping students increase their productivity and decrease their stress.

We are looking for an ambitious Full-Stack Web Developer to join our mission-driven team as we build the student-centric learning management system of the future. As a Top Performer, you will build, test, and maintain scalable web applications that deliver unparalleled product value to our users.

Requirements

- Alignment with Top's Mission, Vision, and Core Values
- Demonstrated proficiency in/with:
 - HTML, CSS, and JavaScript
 - Django, Ruby on Rails, AngularJS, or other web application framework
 - Python, Ruby, Java, or other server-side language
 - Node.js, Apache, Nginx, or other web server technologies
 - MySQL, MongoDB, PostgreSQL, or other database technologies
 - GitLab or analogous version control service
 - API design and development
- Demonstrated ability to:
 - Collaborate with developers, designers, and other team members to produce high-performing, production-ready code
 - Effectively communicate technical concepts to technical and non-technical audiences, verbally and in writing
