MAKING DATA MORE HUMAN

AN EVENING WITH
JER THORP

Tuesday, September 18, 2018, at 7 p.m.
Friends of the USC Libraries Lecture Hall
Doheny Memorial Library 240
Admission is free. Reservations required.
RSVP at visionsandvoices@usc.edu
Reception to follow.

The cutting-edge visualizations of data artist Jer Thorp help us learn about the ways we use digital technologies and become more empathetic in the data age. How can understanding the human side of data lead to innovation and change? In a talk interweaved with beautiful and moving data-visualization projects, Thorp, the current Innovator-in-Residence at the Library of Congress, will illuminate how adding meaning and narrative to data can help people take control of the information that surrounds them, and transform the way we use data.

Presented by USC Visions and Voices: The Arts and Humanities Initiative. Organized by Curtis Fletcher (Ahmanson Lab and Sidney Harman Academy for Polymathic Study) and Tara McPherson (Cinematic Arts and Sidney Harman Academy for Polymathic Study).
