

THE ENVIRONMENTAL FELLOWS AT HARVARD UNIVERSITY

TWO YEARS TO LAUNCH A CAREER

Harvard Environmental Fellows work for two years, supervised by a faculty host in any part of the University. Fellows conduct research in various disciplines of environmental scholarship. They convene frequently in a series of dinners and meetings with faculty to foster intellectual and social connections across disciplines and departments.

The fellowships include a salary of \$68,000 per year, employee health insurance and other benefits, and a \$2,500 per year allowance for travel and other professional expenses.

The Environmental Fellows Program is open to anyone with a doctorate or comparable terminal degree awarded between May 2015 and August 2019.

Past Fellows have gone on to positions at leading academic institutions and in industry, government, and the non-profit sector.

SIX EXCEPTIONAL SCHOLARS

The Selection Committee will seek six men and women whose applications demonstrate:

- the applicant's prior **academic and professional success** and his or her potential contribution to scholarship or practice;
- **the project's significance:** the potential impact of the research project on scholarship at Harvard and on environmental problems;
- **the host's commitment:** the host faculty member's enthusiasm for the proposed project and fellow, the host's ability to mentor the fellow, and his or her ability to provide office space and a productive work environment; and
- **diversity:** The selection committee will select a group of fellows in 2019 who will complement those selected last year, creating a group of approximately a dozen men and women with a diverse set of academic interests, skills, and backgrounds. Recipients—and hosts—may include people with degrees in the sciences, economics, law, government, public policy, public health, medicine, design, and the full array of humanities. Their research topics will be equally varied.

The **Environmental Fellows at Harvard** form a community of researchers with diverse backgrounds united by intellectual curiosity, top-quality scholarship, and a drive to understand the most important environmental challenges facing society.

Complete details on the application process, fellowship requirements, and the 2018 Fellows are available at the Center's website:

www.environment.harvard.edu

Applications for the Environmental Fellowships are due on **January 16, 2019**

The Harvard University **Center for the Environment** will announce the awards in early **March 2019**

The Harvard
University
Center for the
Environment
seeks six
post-doctoral
Environmental
Fellows to begin
Sept '19.

"Harvard is committed to fostering the development of talented scholars with an interest in

environmental research. The Environmental Fellows at Harvard work with some of the University's leading faculty, creating linkages across research disciplines and professional schools, and benefit from all that Harvard has to offer."

— Daniel P. Schrag, Director, Harvard University Center for the Environment
