MCK 149**

By

Dr. Farida Habeeb

To reserve a seat, please e-mail
writing@usc.edu and specify which
date you will attend.

This workshop presents concrete strategies to help graduate students produce stronger writing in their coursework and beyond. Students will learn not just to interpret but to apply well-known theories to help them understand case studies, vignettes, and other practical challenges in their graduate studies and professional life. While the content of this workshop is applicable to graduate students in Social Sciences and Health Sciences, it will be particularly helpful to students in social work and medicine. Please bring your laptop and get ready to write!
