

Academic Advisement

The office of Viterbi Admission and Student Engagement (VASE) provides services and resources to help students in the successful pursuit of their graduate degrees. All engineering graduate students are welcome to stop by to discuss their academics and student life, and especially enrollment, academic progress, academic integrity, financial aid, fellowships, curricular practical training (CPT) and post graduation optional practical training (OPT).

Please note that VASE does not replace departmental academic advice. Advice on courses and research are provided by respective academic departments below.

Visit this link for a complete list of MS academic advisors:

If you're an international student, [here](#) are some important academic resources for you.

Registration of Courses & D-Clearance

Registration in courses are done through the University systems but access and approvals will be different. Please see the important sections below for additional information based on your course registration needs. Most courses need departmental clearance or D-Clearance. On campus students should contact their departmental advisor or request D-Clearance through myviterbi.usc.edu.

Please visit this website for more information:
