

Engemann Health Center

USC Student Health is your source for comprehensive health care. Their services are included in your mandatory Student Health Fee each semester. Their facilities on both campuses are certified by the Accreditation Association for Ambulatory Health Care (AAAHC) and all of the physicians are board certified with clinical faculty appointments in the Keck School of Medicine at USC. Their team is dedicated to providing all of your basic primary care needs and a variety of health and well-being activities through campus wide partnerships. In addition, their office provides several workshops and programs available to you.

Required Immunizations

Prior to starting at USC, you need to take care of certain immunization requirements, whether you are a native or an international student. Please visit [this website](#) for detailed information.
